

PACKPACT YOUR ADVANCED PARTNER IN PROCESSING AND PACKAGING will exhibit at "Gulfood Manufacturing" 2019 trade show, which is going to take place October 29th – 31st 2019 at Dubai World Trade Centre, in Dubai (UAE).

Gulfood Manufacturing is the region's biggest food and beverage processing industry event, that will connect you with suppliers from 60 countries showcasing the latest F&B manufacturing business improvement tools.

PACKPACT YOUR ADVANCED PARTNER IN PROCESSING AND PACKAGING is a network of industry-leading companies in processing and packaging which enables the market the expertise, effectiveness and exhaustiveness of a one-stop-shop service.

The Italian companies joining the Network are now seven and stand out for their expertise and innovative projects; they are present on several markets to provide all the clients with comprehensive technological solutions and to optimize their business.

A complementary network shaped by companies representing the Italian excellence in processing and packaging, able to compete in the global market with all international big players.

Packpact Your advanced partner in Processing & Packaging gives clients the chance to benefit from top technological solutions by industry-leading companies and the possibility to refer to a unique partner for all the manufacturing needs, with a comprehensive range of integrated solutions and an unmatched Made-in-Italy technology.

The Network companies:

CAMA GROUP is a leading supplier of advanced technology secondary packaging systems, continuously investing in innovative solutions;

CLEVERTECH S.p.A., headquartered in the North of Italy, markets engineered front & end-of-line solutions. The company operates in the food & beverage, home care, pet food and personal care sectors;

MAKRO LABELLING S.r.l. is an Italian supplier of industrial labelling machines in beverage, food, home-personal care and pharmaceutical sectors.

During "Gulfood Manufacturing" 2018 Makro Labelling will present to the Middle Eastern market MAK RLF, which is the new serie of rotary labellers for different formats of PET bottle. The use of wrap-round plastic labels on a reel with hot melt application has maximum economic benefits for production compared to traditional OPP or pre-cut paper labels. The modularity of the MAK Roll Feed, a particular feature of Makro Labelling technology, enables the roll feed unit to be replaced with a hot melt unit for pre-cut, wet glue or self-adhesive labels, satisfying the need for maximum production and configuration flexibility. Designed for the high-volume PET labelling market (water and soft drinks sectors in particular), MAK Roll Feed labellers offer a production speed of 6,000 b/h to 40,000 b/h.

RONCHI MARIO S.p.A. is specialized in finding the specific solutions for solving any requirement. Fillers, Cappers, Unscramblers, Orientors are Ronchi's principal products.

TOSA GROUP is among the leaders in the end-of-line market and able to meet every need for stabilization and safety of loads, whether palletized or not, with its complete range of wrapping machines, strapping machines, shrinking machines and pallet handling systems in 115 countries.

UNIVERSAL-PACK S.r.l. is in the world of automatic sachet machines and has created innovative solutions and the most effective technologies for packaging, becoming the leading manufacturer of automatic vertical sachet machines among the best companies in the packaging industry.

Universal-pack's packaging machines and complete lines for primary and secondary packaging can produce sachets sealed on all 4 sides, shaped, stick-packs and boxes, from flat blank as well as pre-glued cartons, for the following sector: food, pharmaceutical, nutraceutical, chemical and cosmetics.

ILPRA S.p.A.'s thermosealing, filling/dosing, thermoforming machines are reference models in the packaging market and provide leading edge packaging solutions, boasting high quality standards, precision and high performance.

The Ilpra Group encompasses several local branches in the main major world markets and boasts a global network of distributors and service support centres that provide widespread knowledge and expertise in target markets. All this makes Ilpra an undisputed worldwide leader in food, industrial and medical applications packaging sectors.

During "Gulfood Manufacturing" 2019 Ilpra will exhibit the machinery **FOODPACK ILPRA Basic**, a small, easy-to-use, semi-automatic machine which is ideal for companies and businesses with space problems or for those who decide to set up new production operations with a modest financial outlay.

The FoodPack Basic model allows companies to perform operations such as sealing only and vacuum and modified atmosphere packaging (MAP).

FoodPack Basic is featured by the innovative technology **Progas®**, which is developed and patented by Ilpra, based on an exclusive work cycle and can be applied to its packaging machines. By limiting the vacuum and compensation phases to just the tray instead of extending it to the complete chamber, the main advantage of ProGas is that it reduces the use and therefore the wastage of gas compared to the residual oxygen in the tray. Ilpra uses this technology to achieve substantially improved productivity thanks to a much faster operating speed.
